DETAILED ACTION

Applicants' arguments, filed February 17, 2009, have been fully considered. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims

Claim Rejections - 35 USC § 112 – Indefiniteness (New Rejection)

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 23 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims recite the limitation "less than about." The term "less than" delineates only numerical values more than the recited value where the term "about" may be less than or more than the recited value. Because of the conflict of terms, it is unclear which term is limiting. See also MPEP 2173.05(b) (citing Amgen v. Chugai, 18 USPQ2d 1016 (Fed. Cir. 1991)).

Claim Rejections - 35 USC § 103 - Obviousness

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 23-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kohl et al. (USP 3,681,091). The rejection is maintained.

Applicant's Arguments

Applicant has amended the claims to include "human" and "at least once daily" to distinguish the claims from the cited prior art. The limitation "at least once daily" is not found, disclosed, taught or suggested in the prior art or the Board of Appeals' decision. Further the prior art did not recognize what an effective amount of composition might be in order to treat dental erosion. This argument is not persuasive.

Examiner's Response

Although Applicants have amended the claims to recite the limitations of "human" and "at least once daily", the claims lack a physical step of actually taking the recited beverage once daily for treating dental erosion. One may be directed to perform a function but does not necessarily follow or perform the actual directed method steps such as when to drink the beverage. The claims still encompass all individuals with natural teeth who drink acidic beverages, such as acidic beverages of the prior art, as indicated in the Board Decision page 7, paragraph 2. Therefore the instant claims are still encompassed by the reference.

Further, as previously discussed in the action mailed November 14, 2008, the limitation "been directed", relates to purely mental steps and/or written material which is non functional and carries no weight when determining patentability of the instant claims. USPTO personnel need not give patentable weight to printed matter absent a new and unobvious functional relationship between the printed matter and the substrate. Further, where the only difference between a prior art product and a claimed product is printed matter that is not functionally related to the product, the content of the printed matter will not distinguish the claimed product from the prior art. See MPEP 2106.01 and 2112.01.

Claims 23-31 are rejected.

No claims allowed.
